

PIIPA Presents Groundbreaking New Book!

Intellectual Property and Human Development Current Trends and Future Scenarios

Prepared by PIIPA's global team of IP professionals, this book examines the social impact of intellectual property laws as they relate to health, food security, education, new technologies, preservation of bio-cultural heritage, and contemporary challenges in promoting the arts. It explores how intellectual property frameworks could be better calibrated to meet socioeconomic needs in countries at different stages of development, with local contexts and culture in mind. Scenarios for the future are discussed. A resource for policy-makers, stakeholders, non-profits, and students, this volume highlights alternative modes of innovation that are emerging to address such diverse challenges as neglected or resurgent diseases in developing countries and the harnessing of creative possibilities on the Internet. The chapters emphasize not only fair access by individuals and communities to intellectual property – protected material, whether a cure, a crop variety, clean technology, a textbook, or a tune – but also the enhancement of their own capabilities in cultural participation and innovation.

- Presents balanced coverage on a range of key topics related to IP and human development all in one volume
- Combines textbook IP theory, perspectives from legal practice, and social science critiques; addresses not only current issues in IP and human development, but also future scenarios and viable solutions
- Combines the inputs of experts from academia, practice and the international/NGO sector – from multiple regions and disciplines - in co-authored articles reflecting diverse view-points

Contents

1. Intellectual property through the lens of human development: an introduction
2. Intellectual property and medicine: towards global health equity
3. Food security and intellectual property rights: finding the linkages
4. Trends and scenarios in the legal protection of traditional knowledge
5. Traditional cultural expressions: preservation and innovation
6. Copyright and capability for education: an approach to intellectual property 'from below'
7. Knowledge and education: pro-access implications of new technologies
8. Cultural diversity and the arts: contemporary challenges for copyright
9. Scenario planning on the future of IP: literature review and implications for human development
